can edit - including you. Unlike Wikipedia articles, which are essentially lists of facts, Wikibooks is made up of linked chapters that aim to teach the reader about a certain subject.

Hp 3800 Stacking Configuration Guide

The stacking feature for the HP 3800 switches allows you to connect up to 10 switches and have them act as a single high-bandwidth switch for both data and management. One switch in the stack is designated as "Commander" and one switch is elected to be the "Standby.". The other switches are designated "Member.".

Stack management for the 3800 switches

Install a Stacking Module into an HP 3800 switch and then boot the switch, as described in the HP 3800 Switch Installation and Getting Started Guide. Make sure that stacking is enabled for the switch: Enter the show stacking

HPE / Aruba 3800 Series - Replacing a Switch Stack Member This guide might be a bit dated as the 3800 series switches have been replaced by the 3810 and are approaching EoL. However, some early HPE 3800 Switches have issues with PoE and four to eight ports will fault at random times, for no apparent reason.

Introduction In this article we will setup an IRF stack with two HP 5130 switches that run Comware OS. What is IRF? IRF (Intelligent Resilient Framework) is a proprietary virtualization/stacking technology used in some HPE switches. It has been developed originally by H3C, but later HPE acquired H3C. IRF allows us to interconnect several switches [...]
