Under the Management of Health and Safety at Work Regulations 1999, the minimum you must do is: identify what could cause injury or illness in your business (hazards) decide how likely it is that someone could be harmed and how seriously (the risk) take action to eliminate the hazard, or if this isn't possible, control the risk

Risk assessment - HSE

Global health and environmental risks, increasing societal shifts towards sustainability and growing reporting requirements are bringing new Health, Safety and Environment (HSE) challenges to the forefront. Changes to the way we work inevitably bring about risks, but also present opportunities to fundamentally re-think what HSE looks like and how to measure it effectively.

Health, Safety and Environment - Deloitte Switzerland

We believe an effective health, safety environmental and quality framework at its core, is based on very simple principles. So forming a structure that supports good work practices will ultimately make you money through reducing uncertainty.
