12 2007 MaxxForce™ DT, 9 & 10: Engine Overview Engine.Oil.Pressure.Sensor. (EOP) The EOP sensor is a variable capacitance-type sensor that is used to detect engine oil pressure. The EOP signal is monitored by the ECM for operation of the instrument panel pressure gauge and the engine warning protection system. Water-In-Fuel.Sensor.(WIF)

2007 MaxxForce DT, 9 & 10: Engine Overview

I have a 2012 international with a maxxforce 7 engine. I'm getting code spn 100 fmi 18 engine oil below warning pressure and spn 100 fmi 1 engine oil system below critical pressure. the pressure drops down to 12 psi at idle. and around 30psi while cruising at operating temp.

I have a 2012 International with a maxxforce 7 engine. I'm ...

International designed these engines to run on high pressure oil to hydraulically actuate each injector electronically by the on board computer which is separate from the fuel system which runs at 75 psi. This engine sounds like it's running on one cylinder but in reality one cylinder is dead with way too much fuel entering the cylinder.
