The Opel cam-in-head engine is a family of automobile engines built by former General Motors subsidiary Opel from 1965 until 1998. Both four- and six-cylinder inline configurations were produced. The name derives from the location of the camshaft, which was neither cam-in-block nor a true overhead camshaft. In the CIH engine the camshaft is located in the cylinder head but sits alongside the valves rather than above them. The overhead valves are actuated through very short tappets ...

This is a OHC engine from the mid-80's (Kadett D, Ascona C, Manta B), the smaller brother of the "Red Top". It has 115 HP and comes with the original 5-speed gearbox. The mileage is around 60k (100k km). The engine was running perfectly and is complete - add fresh oil/water, gas, spark, and you're ready to go.

Pilot bearings crankshaft (rear), Opel cih / OHC / DOHC & 24V engines. If you convert an engine from an automatic to a manual transmission, then exactly this very important part is missing, the pilot bearing. This is a matter of a one sided, sealed needle bearing, into which the transmission input shaft is stuck.
