Sewer Solution - the better RV black tank disposal sewer

...

A pressure sewer system offers a safe, secure alternative. Surmounting Barriers: Roads and streams that separate lots from an existing sewer system are no problem for pressure sewer systems. Directional boring of the small diameter piping can greatly reduce the need for road repairs and traffic disruptions.

Municipal Pumping Solutions: Gravity Sewer Systems vs

...

A pressure sewer system uses submersible grinder pumps that grind sewage particles into a slurry and moves it along. The system uses smaller diameter pipes that are less expensive and easier to install. Plus the pipes follow the terrain and move directionally to skirt obstructions.

Read Online Pressure Sewer Solutions

A pressure sewer system uses small-diameter pipes and grinder pumps, which are often installed at each home. The grinder pump station collects all of the wastewater from the home and grinds it into slurry. The wastewater is then pumped to a larger sewer main or directly to a wastewater treatment plant.
Installations Around the World

Grinder Pumps, Grinder Pump Systems, Pressure Sewer, E/One ...

Overview Pressure sewer is a centralized sewer system that utilises small, low powered, grinder pumps in each property which are then connected to a centralised discharge network. The pressure created at each property connection allows the sewage to be transported to a treatment plant or another connecting sewer system.
